8 years.

Boy's Cotton Golf Hose pair 45c.

A hose for real service. Knit of heavy cotton yarn, pat-
terned in fawn and brown with deep cuffs. Sizes 8 1/2 to
9 1/2.

Surgeon Says United States Intelligence Tests For Immigrants Are In Need Of Revision

Intelligence tests now available must be revised or the methods of securing changed before they are satisfactory for testing immigrants, it appears from a report of Dr. Lawrence K. Kolb, senior surgeon of the U.S. Public Health Service, before the meeting of the American Association for the Study of the Feeble-minded.

The law now provides that no mental defective shall be admitted to this country. But, although psychologists have devised special tests which do not require the use of language, the scores on these tests do not give a true picture of the mental ability of the person tested, Dr. Kolb found. His conclusion is based on the results of tests given to 3,000 persons who had to enter the United States from Europe.

Men do conspicuously better on these non-verbal, or performance tests than do women, although there is no reason to suppose that the men are more intelligent than the women. Children able to read and write do the tests as well as their illiterate mothers, and, because of the difference in age attain a higher intelligence quotient which is mental age divided by actual age.

These facts seem to indicate that ability on the tests depends to some extent at least upon the stimulating character of the environment, and upon the education as well as upon innate capacity which they are supposed to measure, Dr. Kolb believes.

The average of the intelligence quotients of the illiterate women was below 50, which would place half of them in the classification psychologists call "imbecile" or even lower, but this rating is misleading, Dr. Kolb points out.

"The scores doubtless show very poor native intelligence, but they obviously did not mean all that they say. Fifty per cent. of these women are not imbeciles, or even feeble-minded, by any standard standards."

The results for the men were also misleading, he found. Five per cent. of the men from southern Italy received a rating which showed them to have minds developed only to the level of an 8-year-old child, yet all had been able to support themselves and live within the law. It is known that some, with this grade of intelligence, come here, save money and send back home for their relatives.

Strange Bird Bath

Imprint Of Dinosaur's Foot Serves Feathered Tribe At Ottawa

Ottawa may claim to have the most unique bird bath in Canada. One of the large dinosaur footprints found at Peace River, collected for the National Museum of Canada, has been duplicated in cement. It has a length of more than two feet and a depth of five or six inches, and has been placed in the museum grounds.

The birds of the capital now may enjoy the privilege of a morning dip in the unique bath tub moulded from the footprint of a dinosaur made in the mud of a shallow western lake long before the Rocky Mountains arose above the plains.

Preferred Rain

During a political campaign a certain orator spoke to a great gathering of country people. He was impassioned, he was impressive, he was grand. The thunderous applause of the crowd told him so. He thrilled with the consciousness of his power over the minds of men. And, being in this state of mind, he stood in the midst of the assemblage, after speaking, had listened to the comments of the audience.

"What do you think of his speech?" asked one old farmer.

"Well," replied another, "I think that six hours' rain would have done more good!"

Newest In Fountains

An electric drinking fountain has been designed, which only operates when the drinker leans over the fountain. The head intercepts a beam of light shining on an electric eye. This automatically starts a stream of cold water flowing.

Italy has banned all beauty contests.

"I am the luckiest man on earth."

"Just been accepted by her sweet heart?"

"No, just been dismissed by her."

Guard Against Drowning Accidents

Good Swimmers Are Not Always Safe From Danger

Pointing out that more than 60 per cent. of drownings occur in the four months from May to August, and that nearly half of these fatalities are among men and boys under 25 years of age, many of whom are considered expert swimmers, Dr. Ernest H. Lines, chief medical director, New York Life Insurance Company, has cautioned good swimmers against taking risks which may result in their death. He is quoted as saying:

"Contrary to popular belief, a large percentage of drowning cases occur among persons who are considered good swimmers. The reason for this is that these persons, self-confident and at home in the water, take foolhardy chances, overestimate their strength, and disregard ordinary rules of common sense and safety."

Dr. Lines suggests the following 12 safety rules as particularly applicable to good swimmers:

1. Do not go swimming alone or at night.
2. Don't overestimate your strength. Because you have been able to swim a certain distance several times that day, does not mean that you will be able to do it again.
3. Never swim across a lake or river or from headland to island, etc., or in unknown or dangerous waters, unless accompanied by a boat and a strong, level-headed companion trained in life-saving. A sudden change of icy water, fatigue, undertows, cross currents or treacherous tides, may carry you to your death.
4. At the first opportunity learn how to rescue drowning persons without unduly endangering your own life and learn how to administer artificial respiration.
5. Do not attempt to swim to a drowning person's rescue in rough or deep water unless no other help is immediately at hand and you are confident you are capable of effecting a rescue without sacrificing the drowning person's, as well as your own, life.
6. If possible before starting to a rescue call to someone to get a rope, or a boat. If you are dressed, remove shoes and trousers—an extra second or two removing clothing is time well spent.
7. Don't swim for at least two hours after eating, and never swim beyond your depth in very cold water. Severe indigestion or muscle cramps may result.
8. Never drink any cold beverages immediately before going swimming.
9. Skilful in a boat is dangerous. Learn how to enter and leave boats and canoes and how to manage them properly. Beware of sudden squalls and storms, strong winds and a choppy sea.
10. Don't duck or "tease" your friends who are not as good swimmers as yourself. This may create a panic mind which in an emergency may result in their death.
11. Teach your friends who are poor swimmers to go bathing in pairs (preferably with someone else who is a good swimmer), to stay in shallow water, to beware of hidden holes and sudden drops in the sea bottom, and to beware of heavy breakers and undertows.
12. Never dive in unknown, shallow or rocky waters. Even in clear waters remember that "a deep dive is a dangerous dive."—Regina Leader.

454

STILL ANOTHER NEW AND LOVELY DRESS THAT'S SUITED FOR TOWN, AFTERNOONS OR RESORT

Here's one of the smartest and most becoming models Paris has sent us this season. The becoming neckline, so cool and lovely, suits miss or matron.

It is smart carried out as its inspirator in a sheer crepe print topped by plain sheer crepe. It meets many daytime needs. It has special appeal for the business woman.

Style No. 454 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Printed and plain crepe silk is conservatively smart.

For real summer wear, a sheer batiste in gay polka-dots, a sheer linen twill and tubular silks are decidedly chic and practical.

Size 36 requires 3 1/2 yards of 39-inch material with 1 1/4 yards of 39-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coils carefully.

Deplores Craze For Stunts

Detrimental To Best Interests Of Aviation Says Bishop

Col. W. A. Bishop, V.C., whose heroic fighting achievements in the Great War rank him among the foremost of the world, was right when he declared recently that the "flying fool" is the greatest menace to the development of aviation. Col. Bishop has had much experience, which lends considerable weight when he claims stunt flying is detrimental to the best interests of aviation.

Thrills and daring feats in the upper regions are no doubt a great drawing card. But the cause of aviation in the long run is served better by frowning upon anything that merely satisfies the whims for things bordering the spectacular, and, at the same time, involves the risk of human life.

South Africa House

South Africa's new London headquarters are rapidly rising at the eastern corner of Trafalgar Square. The Union Government hopes to be in possession of the building at the end of this year, or early in 1933. On the western point of the square is Canada House, and the vision of the Canadians toward the South Africans across the square is broken only by the Nelson monument and Landseer's lions.

Use Clouds As Screen

Every cloud and every mountain-side would be converted into a motion picture screen by a projector invented by a Berlin engineer. The apparatus has a range of five miles. On low-hanging clouds 230 feet above the earth, pictures 130 feet high can be flashed, while the distance of the machine from the mountain determines the size of the figures.

More than 18,000 people paid to hear a band concert in London recently.

There are about 875 species of iris.

CUSTOMER: "I want you to change this for a British egg. When I opened it this morning it addressed me in a language with which I am entirely unfamiliar."—The Humorist, London, England.

Stabilize Farm Values

Western Agriculture To Become More Profitable In The Reasonably Near Future

With the "reasonably near future" agriculture in western Canada will become more profitable on a more permanent basis than in the past and farm values will become stabilized on the basis of net production returns, said C. M. Bowman, chairman of the board, Mutual Life Insurance Company, Waterloo, before the 18th annual convention of the Dominion Mortgage and Investments Association held in London, Ontario.

Mr. Bowman reviewed the investment and mortgage business of the past year in Canada. He dealt with the various pieces of restrictive legislation in the west designed "presumably to benefit the position of the debtors, but making it increasingly difficult for the mortgagee to enforce his contract," styling this as "undoubtedly an important influence underlying the eastward movement of funds for mortgage investment."

Origin Of Familiar Term

Superstition Of Early Saxons Gave Us "Mares Nest"

Early Saxons believed in the existence of a queer monster named Mara, which crouched on the chest of sleepers (hence the term nightmare). This beast was supposed to live in an estate that was worth upwards of \$40,000,000 in the summer of 1929. Last year he died; and when an inventory of his estate was filed in the Ohio probate court the other day, it was found that \$40,000,000 value had come down to about \$8,500,000.

Could there be a more graphic example of the way in which values have contracted in the last two and one-half years?

Pedestrian's Rights

Organization Contemplated For The Protection Of Those Who Walk

"The Pedestrian's Rights Association" is the latest organization contemplated for the protection of pedestrians on highways and in the public streets. Letters of incorporation have been applied for by a firm of Ottawa barristers.

Isolated Four Centuries

To visit people in remote districts in the forests of the Nijni-Novgorod province of Russia who have been isolated from the rest of the world for 400 years an expedition left Moscow in June. The inhabitants of the districts still speak Russian as it was spoken in the sixteenth century.

Former German Crown Prince May Succeed Von Hindenburg

What is regarded by the masses in Germany as the first step towards the restoration of the monarchy in the Fatherland will take place on October 2, if rumors persistently gaining ground in Berlin are to be believed. The report, the source of which is one of the most important newspapers in the chain owned by Dr. Alfred Hugenberg, opponent of Von Hindenburg in the recent Presidential election and head of the Nationalist Party, is to the effect that President Paul von Hindenburg intends to retire on his 85th birthday and urge that he be succeeded by former Crown Prince Wilhelm. Although the rumors are vigorously denied in governmental circles, political observers point out that there has been a steady growth of Junkerism in the New Republic since Dr. Heinrich Brüning, recently ousted Chancellor, came into power. The appointment of Franz von Papen to succeed Brüning, they say, is further evidence of that trend.

Prospectors Are Warned

Goldseekers On Northward Trek Should Be Well Grub-staked

Fearing the discovery of rich gold ore in the Nahai district, west of Seward, Alaska, would start unemployed on a northward trek, Thomas Babcock, who made the strike, warned men against going into the district unless they have "sufficient food to carry them through the winter."

Free gold ore estimated to run \$50,000 a ton was found in a deep tunnel of the Babcock and Downie mine by Babcock. Rich specimens of float were reported discovered by Charlie Boyne.

A large portion of the area is unprospected, Babcock said, but prospectors had better come grub-staked."

Donor Was Unknown

Furnishings Of Warrior's Chapel In Westminster Abbey Anonymous Gift

The Dean of Westminster, Dr. Foxley Norris, has revealed that the rich furnishings of the warrior's chapel in Westminster Abbey, were provided by an anonymous donor at the cost of half his savings. He died without seeing them.

The Prince of Wales attended the opening of the chapel, which is to serve as a shrine of remembrance to mothers, widows, and orphans of those who fell in the war. It was dedicated by the prince at a service held in the Abbey during the 1926 Imperial Conference.

This spring the prairie provinces had 12,398,200 acres under summer fallow. 502,000 acres of new breaking and 6,768,000 of fall plowing—a total acreage prepared in the previous year of 19,668,200.

Nearly one-third of the adult male population of France today consists of bachelors.

Not Satisfactorily Correct

Statue Of Beethoven Shows Him Wearing Baggy Trousers

The question of whether or not Beethoven wore baggy trousers while composing some of his immortal symphonies may have to be settled officially.

A statue, now nearing completion at the hands of a Glendale sculptor, shows Beethoven with baggy trousers. The Los Angeles Park Commission, which must approve it, has indicated it is not pleased with the trousers.

Construction of public works in France is increasing.

Belgium now has only about 170,000 unemployed.

Dublin, Irish Free State, has a campaign for better movies.

"Are red cheeks a sign of good health?"

"Yes."

"Then you are healthier one's c'd than the other."—Kasper, Stockholm.

Three European Nations Have Reciprocally Agreed Not To Impose Any New Tariffs

Newest Northern Ontario Seaport

Moosonee, On James Bay, Plans For Settlement Of 5,000 People

The day before yesterday, figuratively speaking, the Hudson Bay region was ultima Thule as far as it concerned the vacation traveller. Now a line of steel in Manitoba follows the Nelson River for many miles then turns north to the port of Churchill. An even more recent penetration is the extension of the Temiskaming and Northern Ontario Railway through northern Ontario to the old fur-traders' rendezvous at Moose Factory, Northwards from Cochrane the railway line follows the Abitibi River to the Moose and then turns eastward to James Bay. Here will be located the newest seaport of northern Ontario, Moosonee, where plans for a settlement of 5,000 people are under way.

A survey party is now laying out the townsite in accordance with the accepted plans which provide for schools, hotel, public buildings, hospital and sports field. Water for Moosonee will be supplied from Stone Creek. The 300 acre town will lie on the northern side of the Moose River, and will stretch for two and a half miles along the shore. The townsite will be the terminal of the line and will serve as a base for development along the coast of Hudson Bay such as fishing operations, the fur-trade and the pulp industry.

For years canoeists journeying down the Abitibi, Missinibi or Matagami Rivers to the Moose River and thence to the Bay, were faced with the prospect of an arduous return trip up one of these rivers. Now the back-breaking tracking and poling of canoes up the rapids, and the labor of carrying damage bags and quest over the portages has been rendered unnecessary. No longer need the pleasure of these cruises be marred by the thought of a laborious return—the "Iron Horse" has solved the difficulty.

The extension of this Ontario government owned railway has opened up some very attractive new fishing waters. Many of the smaller streams in this new section abound with brook trout and in some of the larger streams even sturgeon may be hooked.

Adopt Egg Regulations

Plan Has Now Been Finally Adopted By Ontario

Amendments to the federal egg regulations have now been finally adopted by the province of Ontario by proclamation in the official "Ontario Gazette," according to a statement issued by G. B. Rothwell, Dominion Live Stock Commissioner. The egg regulations are administered by the Department of Agriculture at Ottawa under the authority of federal statute, and their adoption by Ontario makes them fully operative throughout Dominion. The general principle of the regulations is not altered in any way in the amendments. Some changes have been made in country buying regulations designed to secure for the producer full graded value for his product.

Checking Gas Output

Effort Made To Curb Flow Of Gas In Turner Valley

The research staff of the Turner Valley conservation board will resume its work in the valley, testing well productions in an effort to curb the total gas flow to 200,000,000 cubic feet per day.

Following dismissal at Edmonton of an action brought by Spooner Oils, Ltd., against the Turner Valley Gas Board, and the Alberta attorney-general, Frank P. Fisher, technical advice to the board, and notices would be sent to all producing companies formally advising them of the court's decision. The Gas Conservation Act, he said, is in a "state of status quo" and the original order of the board will be put into effect immediately.

Donor Was Unknown

Furnishings Of Warrior's Chapel In Westminster Abbey Anonymous Gift

The Dean of Westminster, Dr. Foxley Norris, has revealed that the rich furnishings of the warrior's chapel in Westminster Abbey, were provided by an anonymous donor at the cost of half his savings. He died without seeing them.

The Prince of Wales attended the opening of the chapel, which is to serve as a shrine of remembrance to mothers, widows, and orphans of those who fell in the war. It was dedicated by the prince at a service held in the Abbey during the 1926 Imperial Conference.

Nearly one-third of the adult male population of France today consists of bachelors.

Representatives Of The Governments

Of Holland, Belgium and Luxembourg Have Reciprocally Agreed Not To Impose Any New Tariffs And To Proceed By Annual Reductions Of 10 Per Cent. Until A Defined Tariff Level Is Reached.

They further undertake not to impose between themselves any new measure of restriction on imports or exports—such as quotas—except in special determined cases. Any other state will be entitled to adhere to the convention on a footing of equality with the signatory states.

It is preceded by a preamble in which the contracting states declare they are "permeated that progressive realization of greater freedom of trade is one of the essential conditions for world prosperity. They further declare they are desirous of undertaking in this sense concerted action in which all states will be entitled to participate, thus contributing to the re-establishment of the general economic situation."

The necessity of some action to restore the stability of the monetary system and of re-establishing international credit with removal or amelioration of the trade restrictive measures that have appeared in late years, was urged in a resolution adopted by the three countries and Denmark, Sweden, and Norway, of which the agreement is the outcome.

International Friendship

Dedication Of Waterton-Glacier Peace Park

Another link has been added to the chain of international friendship between Canada and United States.

In the midst of border mountains and lakes, representatives of both countries extended international greetings as they dedicated the Waterton-Glacier Peace Park to 117 years of goodwill between the two nations.

Sir Charles Mander, Bart., of Wolverhampton, England, director and past president of Rotary in Great Britain, presided at the colorful ceremony, attended by representatives of political and clerical and hundreds of Rotary international members who sponsored the project.

Messages from Prime Minister Bennett and President Hoover were read by Lieutenant-Governor Walsh of Alberta and Governor John E. Erickson of Montana. Premier J. E. Brownlee headed a group of Alberta representatives, including Senator W. A. Buchanan.

Bands and church choirs from Montana attended.

Checking Gas Output

Effort Made To Curb Flow Of Gas In Turner Valley

The research staff of the Turner Valley conservation board will resume its work in the valley, testing well productions in an effort to curb the total gas flow to 200,000,000 cubic feet per day.

ADOLF HITLER. PRESIDENT PAUL VON HINDENBURG.

Orangemen Have a Great Day

A perfect day greeted the local Loyal Orange Lodge on the 12th, the day of their big celebration. Orangemen from all parts of the province journeyed here for the big day and took part with the local lodge in the parade. The parade was very impressive, some 400 members of the order taking part. The colorful regalia and large banners made a wonderful display. The parade, which was led by King William on his snow white charger started for the Exhibition Grounds at about eleven o'clock. Behind the white horse was a large brass band which played numerous orange airs. There were two pipers and drums in the parade as well as other musicians. The picnic and sports programme which was held at the Exhibition Grounds was very much enjoyed by all. There were baseball and football games, tug-of-war, in fact every kind of game for young and old. There were also in attendance several interesting speakers to add to the enjoyment of the afternoon and evening. The celebration was completed by a big dance at the open air pavilion on the grounds, and the floor was crowded until the wee sma' hours of the morning. The weather remained perfect right to the end of the programme, — it was the warmest day of the season, and everyone who attended the celebration were greatly pleased with the programme and with the entire outing.

Bentley's Barbecue July 19th

Miss Alice Blaikie of the Bank of Montreal staff returned from her holidays last week. Mr. Weatherall will open his new Red and White Chain Store this week. Everyone is invited to come and inspect this fine new building. Mr. J. Carritt motored to Edmonton on Monday. Mr. and Mrs. Drake of Edmonton were visitors in Bentley over the week end at the home of Mr. and Mrs. Percy Thorpe. Mrs. Page of the Co-Operative Store Staff is now on her vacation. Work is coming on fine at the new hospital. The septic tank, well, etc., are constructed. The car of lumber is on hand and construction will start at once. The Bentley Creamery will start production of butter this week. Dr. Bow, Deputy Minister of Health was in Bentley this week looking over the hospital plans, etc. Mr. W. Pringle and his two sons attended the Calgary Stampede for a few days this week. Born at Bentley Hospital on Monday, July 11th, to Mr. and Mrs. V. Owan, a daughter. Don't forget the big Picnic on July 19th. Aerobane, Dance, Barbecue, etc. A wonderful time assured to all.

REBEKAHS HOLD MEETING

On Thursday evening, July 7th, at a special meeting, officers of Lacombe Rebekah Lodge No. 101, were installed as follows: P.N.G. Eva Shaw; Noble Grand, Opal Banner; Vice Grand, Beulah Buch; Warden, Sadie Paul; Conf. Alma Saunders; Musician H. Clark; Chaplain, Inez Clark; R.S.V.G., Mattie Reeves; L.S.N.G., Christian Peterson; R.S.

V.G.; Lillian Hunter, L.S.V.G.; Clara Douglas; I.G., Mary Fraser; O.G., Day Saunders.

Mrs. Emma App of Wetaskiwin, with the assistance of a staff of Lacombe members, performed the installation ceremonies.

At the close of Lodge, refreshments were served and pleasant social time spent.

GOLF TOURNAMENT

Everything is in readiness for the annual tournament of the Lacombe Golf and Country Club. This year's tournament promises to be bigger and better than ever and entries are in from all over Alberta. The course is now in wonderful shape and there should be some great games. The ladies' of the Club will be serving lunches at the Club House on both Friday and Saturday.

A full list of winners will appear in next week's Globe.

ALBERTA'S GREAT CROP

People never cease marveling at the growth of crops. There is something about a stand of wheat that calls up a primitive emotion of exultation. It is likely that no man has ever succeeded in dislocating himself from the soil entirely, even the back-lot stimulating the city-bred to the vigor necessary to wield the spade and hoe, and to us in Alberta so thoroughly dependent on the land produce of the soil means much in satisfaction.

This year especially, the new crop is worth taking a holiday to see. A report from Ottawa says that the Alberta crops are above the average and the most promising in Canada, and a crop "above average" grown on the soil of central and northern Alberta is a sight over which no one can fail to exclaim. There is a strength to the lush stand of green that is more than beauty. It is a satisfaction in the regard of those who work to produce the wealth of this province.

While the farmer is not likely to wax poetical over the growth of wheat, the figures of the Ottawa estimate, are suggestive of what must be the degree of his optimism. Last year's crop was by no means

light, but in terms of long-time average wheat averages the wheat crop this year, as at June 30, is 28 per cent. better than at the same time a year ago. It is five per cent. over average, and three per cent. better than it was on May 31. The other cereal crops are estimated at similar increases with oats 50 per cent. better than last year, barley 15 per cent., rye 21 per cent., and flax 39 per cent.

The complaint of low prices for wheat does not in the least discount these figures. Granted that the price is low, it is not likely to be lower than the average for last year, so that if the estimates given are real, and at the present time there is every sign that they may be bettered, the farmer will receive for his crop an amount 25 per cent. more than he got in 1931. At the present cash price of No. 1 Northern at Winnipeg the increased returns would be equal to a rise of 13 cents a bushel in the price of wheat.

Alberta has every reason to look forward to this fall with confidence.

AT THE AVALON THEATRE BROKEN LULLABY

Aside from its technical skill, its brilliant direction, its clever acting and convincing atmosphere is one of the most arresting, compelling dramatic film plots I've viewed in a few cinema seasons. It is a dramatic production that will leave no audience unmoved. With the Lubitch direction, its most bitterly beautiful film Broadway has offered in many, many months.

Julius Well, N.Y. Graphic COMING—Janel Gayner and Charles Farrell in "Delicious", July 21 to 23. "The Rainbow Trail", July 28, 29, and 30.

RUNNING TRUE TO FORM

From Chicago Herald-Examiner: Edward Young Clarke, Imperial Kluge of the Ku Klux Klan, who arrived in Chicago from Atlanta, bursting with ideas for cleaning up in a big way, is in trouble. Kluge's scheme was destined to end in the depression by enlisting a million members — at ten to twenty-five

dollars each. The Kluge's work, however, was somewhat cramped by an indictment in Jacksonville, Florida, for using the mails to defraud, another rap against him in Houston, Texas, on a white slave charge, and over all, because of shady work in Jessup, the dark shadow of the Georgia chain gang.

The deadliest curse in this country today—and of course we are not talking over anything new—is the professional chiseler. The cunningest leech who will do anything for money except work for it. The born grafter who would rather acquire one dollar crookedly than a hundred honestly. Every community in America is infested with these parasites. If we could only devise some way of exterminating them!

Clarke is now before the Illinois courts on a charge of defrauding the people out of thousands of dollars.

The Lost Tribe

A transient was sent to jail for a month the other day for attacking a constable who told 30 transients to "keep going."

The sentence was imposed, of course, because he attacked an officer and such attacks cannot be tolerated if we are to maintain order in this country. It is interesting, however, to speculate upon the man's indignation at being told to "keep going." It is the wish of every municipality in the Dominion that all transient unemployed who come within their boundaries shall "keep going" until they get out of them again. In other words, our problem would be partially solved if the transient unemployed of Canada kept going until they all went into the Pacific or the Atlantic. Humanity forbids that anyone should make the suggestion, but the unvoiced thought is an inevitable accompaniment of the fact that no city, town or village of Canada wants these men to stay.

Add to this the fact that certain producers would benefit if present stores of their products were destroyed, and we have some conception of the amazing contradictions of these times. There are people in need of goods and there are goods which are rotting in storerooms; there are great areas in need of ultimate settlement and great projects which will produce a huge demand for labor, and there are men who are condemned by immediate necessities to "keep going."

All this may appear to be banality. So much has been written of the obvious enough paradox of superabundance producing a lack! But it is not banality to point that the situation may, in some respects at least, be improved.

We are willing to admit that the pressure of uncommenced goods upon our country is the result of many complex forces and that, however simple the situations may appear, adequate readjustments will probably be equally complex and prolonged. We are not willing to admit that transients should be "moved on" indefinitely. Here, at least, organization could be applied in relatively short time.

These men are for the most part healthy. They have clothes to cover them; presumably they usually have food to eat. Many, we notice have cigarettes and tobacco to smoke. In other words, they are extracting a living from the country. The method of doing so is demoralizing both to themselves and to the community as a whole—for they have become predatory and insecure nomads, snatching a living as best they can from a country which officially at least, seems to resent their existence.

It is possible to moralize indefinitely about this lost tribe in our midst. It is possible to point cases of men who have refused work and to impugn their willingness to labor to all on the strength of these cases. It is possible, on the other hand to moralize about the injustice suffered by the men who built our bridges and drained our swamps in the days before yesterday. We are interested here, not with moral issues, but with the simple fact of the existence of this tribe, and the social deterioration which must ensue from it.

For two years the nomads have been wandering and they have somehow snatched a living from the country. They will continue to wander and will continue to snatch a living from the country—while the bitterness wells and the rift between him who has and him who has not becomes bigger and bigger—until the Dominion Government takes responsibility out of the hands of local authorities and organizes the transients so that they may enjoy at least a vestige of security.

The cost to the country would eventually be the same, although the government would have to make up for the thousands of dollars which are today expended promiscuously by Canadian citizens in casual donations on street corners and at the doors of their houses.

Our Big Fair & Stampede August 2-3

Preparations are well under way for Lacombe's Big Fair and Stampede. The Fair this year is strictly agricultural, a prize list of which appears on another page. The Stampede promises to be a good one, as riders will be here from far and near. Some of the riders at the Calgary Stampede will do their stuff here. There will be bucking broncos, wild steers, roping, bull-dogging, deerating, chuck wagon races, in fact every kind of sport common to a stampede. Some good running horse races will be on the program, as well as Indian pony races. A good midway will be going day and night, so plan to attend. Remember the dates, August 2nd and 3rd.

Why be depressed \$1.00 will make you look prosperous—Rainbow Cleaners.
 Dr. and Mrs. Moore are leaving for the coast this week, where they will spend a couple of weeks.

Rev. John Woods, of Carson, Iowa, will preach in St. Andrew's Church on Sunday, July 24th.

Flannella, Knickerbocker, Sult, Top-Corder or what have you, will take the DEPRESSION out of them all. Rainbow Cleaners.

The lady members of the Golf Club and wives of members of the Club are expected to help serve at the tournament on Friday and Saturday.

Tremendous! It's bigger than that! "Broken Lullaby" is the most magnificent and at the same time, the most simple and heart-warming picture that Ernest Lubitch, master of them all, has ever directed.

In connection with the coming Fair, twenty citizens have been deputized to call on all residents and solicit their purchase of a Membership Ticket for 1932. This ticket admits purchaser and wife, or any two on both days to grounds and grandstand.

When on your holidays let us attend your cleaning wants—all you have to do before you go is leave your garments at our plant and tell us where to ship them to—and when you arrive at your destination, they will be there. And always remember "Our Prices are Right." Rainbow Cleaners.

Word has been received from the Brandon and Calgary Fairs that Lacombe's Fair has held the old-time record. At Brandon 2nd place was won by a total score of 96.5, which was duplicated at Calgary, where second place was also won by the same score.

Next Wednesday is the day of the Whirlygig Swim at Gull Lake. A large crowd is expected and entries from all the Swimming, Boating and Canoe Clubs are pouring in now. A large midway has been secured for the occasion and two aeroplanes will be there to carry passengers. There will be some of the most thrilling motor boat races ever seen here, and that's saying something, as the races last year were plenty fast. The canoe events will be exceptionally good this year, as many new clubs have entered. There will be fancy diving and demonstrations of life saving—every kind of water sport imaginable. Be at Aspen Beach at 11 a.m.; Canyon at 3 p.m. Blackfalds at 5 p.m. All are welcome to these services. The Subject will be "The Ministry of Comfort."

BLACKFALDS NEWS
 The Pastor having returned from his holidays, the regular services will be held at the usual hours: Spruceville at 11 a.m.; Canyon at 3 p.m. Blackfalds at 5 p.m. All are welcome to these services. The Subject will be "The Ministry of Comfort."

STAR CAFE HOLDING A BIG CONTEST
 Watch for the large posters announcing the big contest being put on by the Star Cafe. Between July 15th and August 24th tickets will be given to every person being served with an order of Ice Cream, or Meal to the value of 25c. These tickets will be numbered and a draw will be made on August 24th at 3 p.m. There will be thirty winning tickets and \$100.00 in prizes will be given to the lucky ticket holders. Chief of Police Archie MacDonald will draw the numbers. Eat a meal or an order of Ice Cream at the Star Cafe and you may win one of the valuable prizes.

NOT PATRIOTISM
 The situation which has arisen between Governor-General James McNair, of the Irish Free State, and President De Valera is most unfortunate, especially from the latter's point of view.
 The Governor-General has demanded an apology or his own removal from office on account of a succession of insults he claims he has received from the Irish Free State Government.
 If he has been insulted, then the Free State authorities have shown appalling statesmanship. If De Valera party does not believe in allegiance to the British Crown, it is

Lacombe Exhibition and Stampede

Lacombe Agricultural Society's 39th Annual Fair TUESDAY AND WEDNESDAY AUGUST 2nd and 3rd

No Entry Fees—and No Bedding or Feed Supplied. No Entries Taken by Phone and All Entries Must be in by 5 p.m. July 30th.

Judging to Start 1 o'clock, August 2nd. Rules of 1931 Prize List to Apply

Surplus Proceeds Will be Prorated to Prize Winners

The Lacombe Fair will be a strictly Live Stock Exhibit this year and as the strictest economy is necessary in expenditure there will not be any prize list published in book form. The list as published below will be the only list issued and everyone interested will preserve this copy of the Western Globe as their guide in making entries.

1931 Directors were re-appointed for the Year 1932. Henry Trame, President, and D. F. Chisholm, Secretary.

Obviously mutilated to his belief. If it is elected to power, it is entitled to attempt to remove that allegiance by constitutional means. But to insult the representative of the King while he is still in the country can have only one effect—to create the impression that antagonism to British sovereignty on the part of Ireland is the product neither of political logic nor of a deep-seated emotional desire for freedom, but merely of petty antagonism.
 The men who are fighting sincerely for a political conviction and the men who have sincerely do not stoop to petty insults.

TO RENT
 7-roomed house with well adjoining, garage. Good location. \$22.00 per month. Fraser-MacDonald Agency.

CATTLE DIVISION
 DIRECTORS IN CHARGE—Stan. Switzer, J. Darroch, S. J. Henderson

Holidays are here, let us attend to your cleaning wants. We guarantee results. Rainbow Cleaners.

WORLD HAPPENINGS
BRIEFLY TOLD

Eighty-two divorces were granted in Ontario last year.

Milk has dropped to eight cents a quart in Ottawa, the lowest price since 1921.

The Pope has approved construction of a new power station to make the paper plant self-sufficient so far as electricity is concerned.

Having a face value of eight cents, a South African emergency stamp issued 77 years ago, was sold recently in London for \$740.

Napoleon Bonaparte, of Springbank, Alberta, who acted as interpreter during the trial of Louis Riel in 1885, died recently at Calgary after a brief illness. He was 71 years old.

Officials of the Harbor Grace, Nfld., airport, have received \$200 from Amelia Earhart Putnam in appreciation of their services at the start of her trans-Atlantic flight.

The Prince of Wales has consented to become patron of the Impalpable fund which is being raised to save the old wooden battleship as a holiday training ship for boys.

P. Felt of the Canadian Pacific Railway police, Montreal, captured the individual high score trophy for 1932 in the Dominion marksmen chief constables' revolver competition.

A high place in the New South Wales philatelic exhibition, held recently at Sydney, has been awarded to Canadian postage stamps, according to announcement from the post office department.

Depression has hit the medical profession membership of the Canadian Medical Association, which dropped 393 this year, due largely to doctors in the west being unable to pay their fees. The total membership is 3,444.

Admiral Sir Ernie Chatfield, commander-in-chief of British naval forces in the Mediterranean, will succeed Admiral Sir Frederick L. Field, first sea lord, as a lord commander of the admiralty and chief of the naval staff, according to an order of the admiralty board effective February 28, 1933.

Where Milk Is Scarce

Settlement in Northern Manitoba Has Only One Cow

Although the government of Manitoba may take over the milk industry of the Province and operate it as a public utility, it is not expected there will be any change in the price of milk in the little settlement of Pukitewit, where the Hudson Bay Railway has a division point. The milk industry there is a monopoly. One cow, Betty Jane, controls the whole output and it sells for 50 cents a quart. Betty Jane is the only cow so far able to survive in that part of the country, whose winter elements are not propitious to the dairy industry.

Pays Visit To London

Madrid's Lord Mayor More An Institution Than An Individual

Don Pedro Rico, the lord mayor of Madrid, the heaviest lord mayor in the world, recently paid a ceremonial visit to London.

In Madrid Don Pedro is an institution rather than an individual. He weighs 280 pounds.

He was anxious that London should see some of the pomp and pompousness of ancient Spain, so he brought with him his crimson Castilian cape, an article of apparel before which the robes of the Lord Mayor of London paled into insignificance.

Coffee Being Destroyed

Brazil's program of destruction of coffee to support the price of that commodity in all markets has now been in force exactly one year. In that time 7,105,000 bags of coffee beans have been burned or otherwise destroyed. They were valued at approximately \$30,000,000. Funds for the program are obtained from a tax of five francs a bag on coffee exported from the State of Sao Paulo.

A German who proposed to walk round the world got as far as Mancharia, where he married and settled down. A journey of this kind entails many dangers.

Almost one-half of the iron and steel produced in Germany last year was exported.

When Olsen has had a night out, his "chief" balances the petty cash—Kariakuren, Oslo.

Old Fur Trading Contracts

Archivist Revealing Conditions In Early Days Of New France

Study of conditions in the fur trading business in the early days of New France throws a revealing light on the life of that period. E. Z. Massicotte, Montreal archivist, reports in connection with his investigation of the interpretation of contracts drawn up between early French traders and settlers and French exporting and exploring companies.

The archivist has traced 13,055 contracts signed between the years 1670 and 1770. It shows that traders undertook, even in those early days, to travel in northern Quebec, to the Lake Superior district and west of Lake Winnipeg. The contracts of some of the men who first ventured beyond the Rockies have been unearthed by Mr. Massicotte, and he soon expects to publish his findings in this connection in volume form. Detroit and the southern United States received their quota of pioneers.

Some women ventured to travel the rough paths with the first adventurers. But as early as 1700 some women took to the trail and soon afterwards whole families moved into the wilderness in search of pelts and forest game. "The women revealed the same fortitude and courage as men," says the archivist.

Chance For Canada

Sterilized, Cream Export Suggested By Montreal Produce Firm

Henderson-Stuart, Ltd., produce brokers in Montreal, have written to the Quebec Department of Agriculture stating they had received information from England that sterilized cream in six-ounce tins were being imported into England in increasing quantities. The butter fat content, according to the letter, was approximately 25 per cent, and the price was 12 shillings for 46 lbs.

In the letter, the writer says, the great bulk of the supply was imported from Holland and Denmark, but on account of a recently imposed 10 per cent duty, the importers are looking to Canada for supplementary supplies. The letter concludes as follows: "It is evident that the Dane, who obtains the highest price for butter in England can afford to deliver his cream instead of butter it might be worth while to investigate the possibilities closely."

Opening Of Churchill

Townsite Delayed

Security Of Employment Necessary Before Settlers Allowed In

Formal opening of the port of Churchill during the present season would meet with the full approval of the Manitoba Government, two cabinet ministers stated. They added the hope that the port would be opened, which would advertise the prairie's direct outlet to the sea to the world and viewed with favor the suggestion that overseas delegates to the Imperial Economic Conference should attend.

Whatever steps are taken by the Federal Government it is unlikely the Manitoba Government will open the Churchill townsite to settlement this year. A number of improvements must be made before a permanent population can be accommodated, and it is felt it would be inadvisable to admit settlers until enough industries or trades are established to offer some security of employment.

Improving On Nature

Scientists Could Get Excellent Ideas From Fish

A Day of Quinte angler told the fish story the other day—and has the fish to prove it—that commands respect. He caught a nine-pound pickerel. Inside the pickerel was a smaller fish, inside that fish was a still smaller fish, and—believe it or not—inside the third fish was a minnow. And inside the minnow were eggs.

Scientists have done wonderful things by improving the grade of beef cattle, getting more milk out of cows, making hens lay more eggs, causing two blades of grass to grow where one grew before, and so on. With this fish story in mind, why can't they so improve the breeds at the hatcheries that they will produce fishes that will grow double, triple, or quadruple?

Think how nice it would be if a housewife bought a fish at the market and found another one or more inside? That's the way to end the agricultural depression—St. Thomas Times-Journal.

B.C. Lumber Taken East

The freighter "Vernon City" carrying 1,500,000 feet of British Columbia lumber, unloaded 500,000 feet at Quebec. The cargo discharged consisted of fir, cedar, hemlock, and pine. The "Vernon City" continued up to Montreal to unload the remainder of the shipment.

Had Thrilling Experience

Major L. H. Brereton, commander of France air field at Panama City, had to swim for his life, through waters infested by crocodiles when his plane fell into Gatun Lake near Colon. Rain fouled the magnets and the motor failed. He was not injured.

Manufacturing in Manitoba increased 11.1 per cent in the period 1923-1933.

Putting Empire First

Achievements Of British Empire Marketing Board Show Right Spirit

Empire preferences are not wholly a matter of tariff preferences. There is the story of the Empire Marketing Board in Great Britain, which, through earnest work and propaganda, has achieved the following:

1. More than 1,200 British institutions, including scores of Borough and County Councils, are now following the rule "Empire First" in the purchase of supplies.

2. The London County Council, one of the largest local purchasers in the world, providing for 100,000 hospital patients and 900,000 teachers, students and children, is now restricting its purchases exclusively to Empire goods.

3. Out of 1,400,000 pounds of apples consumed in Britain last year, 1,100,000 pounds were from Empire sources.

4. British Columbia timber is now being used for harbor works at Belfast, Grimsby, Falmouth and Southampton, and for schemes in Glasgow, Liverpool, London and Coventry.

5. Empire timbers, chiefly Canadian-grown Douglas fir, have been used exclusively in forty-five out of forty-seven important works undertaken by the London Council in the past two years.

This, surely, is an impressive record. What it shows is that preferential trading within the British family of nations can be extended far beyond mere treaties and tariffs. Agreements are desirable, even necessary, but when they are accompanied by preferences based on common loyalties and good-will, then the consequences are bound to be tremendous. "Buy Empire" should be a good slogan for all of us.—Ottawa Journal.

Not Duty Of Government

National Broadcasting Should Leave Education To Universities and Schools

It is no function of the Dominion Government to start in educating people by radio, and least of all to start in educating them in some particular thing. If any of our universities feel that they would like to use radio in extending their particular courses, then it would appear to us that it is up to them to use small private stations, and at the same time start their own monopolizing radio broadcasts, and using for the purpose the revenue derived from the taxes of tens of thousands of persons who might not have the slightest interest in this particular sort of education, would be, to say the least, absurd.

National broadcasting in this country had better leave education to the schools and universities. Good programs will have on educational value in themselves; they are all that are either desirable or necessary.—Ottawa Journal.

New Rule For Loans

But Financial Man's Idea Might Not Always Work

A certain prominent financial man was saying at a dinner party the other night that he never loaned money to a man until he met his wife. "I'd say bring your wife in to see me, and then if she looked the type that paid her bills, I'd consider the loan."

"Then," said a woman at the party, "there ought to be a school of facial expression teaching us to register economy and honesty."

Stainless Steel Secret

Story Of Discovery Will Be Revealed In 1960

The story of the discovery of stainless steel, a secret for several years, is not to be told for another three decades. Harry Brearley, discoverer of the process, has given the "cutlers' company" of Sheffield a sealed envelope, announcing the society not to open it until the cutlers' feast of 1960. The envelope contains his story of the discovery.

Loses Honorary Title

The name of ex-Kaiser Wilhelm II. has finally been dropped off the register of the Spanish army. Ex-King Alfonso XIII, who took over everything a big interest in military affairs, appointed the Kaiser an honorary captain-general of the army of Spain. In the roster, the king's name appeared first as captain-general.

Eggs, butter, milk and salmon are the best means of providing vitamin "D" through food.

"Are you moving?" "No, but we hear so much about burglars that I like to take my things with me."—Lustige Kieme, Leipzig.

New Method Of Farm Management

Colonization Finance Corporation Adds To Staff Of Zone Managers

The recent appointment of a staff of six zone managers by the Colonization Finance Corporation of Canada, Limited, to assist farmers to develop their farms, has been a landmark in the history of the corporation.

During the same period Professor Sommerfeld joined the pioneer class in Agriculture at the University of Saskatchewan, was graduated from that institution with the degree of B.S.A. He followed this up with a year at the University of Wisconsin from which he received the degree of Master of Science in 1922.

Seven years as professor of animal husbandry and farm manager at Manitoba Agricultural College followed.

After attending the University of Minnesota, taking animal husbandry as a major, and agricultural economics and farm management as minor courses, he just recently received his degree of Ph.D. from the University of Minnesota.

Professor Sommerfeld has been in frequent requisition as judge of livestock at fairs and exhibitions, including Brandon, Regina and Saskatoon. He also has trained stock judging teams in Manitoba Agricultural College, which have won four first prizes in six years, one of which was at the Toronto Royal Fair, in 1929.

He has been a member of the Agricultural Extension Department of both Manitoba and Saskatchewan. O. S. Longman, Indian Head, Sask.

O. S. Longman, who takes over the management of the Indian Head, Sask., zone, was born near Canby, Sask., and grew up in the Deloraine, Man. He is a graduate of Manitoba Agricultural College, and has been instructor in agricultural mechanics, field husbandry and other farm subjects at agriculture schools at Clarendon and Onda, Alberta. In 1920 he was appointed principal of the school of Agriculture at Raymond, Alberta, and in this capacity superintended irrigation demonstration and extension services among the farmers.

For some time Mr. Longman has been the staff of the Alberta Department of Agriculture and in this connection conducted special investigations into conditions in the irrigated and drought stricken areas of that province. His report on the dry areas resulted in the passing of the Berry Creek Area Act by the Alberta Legislature. He has also made a study of the best irrigation system, a survey looking to the establishment of a sugar beet industry in Southern Alberta, control of noxious weeds, use of chemical fertilizers, and breeding and management of livestock.

Mr. Longman's appointment to the staff of the Colonization Finance Corporation was felt as a distinct loss by the farmers of Alberta and was deeply regretted by the residents of Hanna and Victoria.

Joe B. Day, Oxbow, Sask., was born near Canby, Sask., and grew up in the Deloraine, Man. He is a graduate of Manitoba Agricultural College, and has been instructor in agricultural mechanics, field husbandry and other farm subjects at agriculture schools at Clarendon and Onda, Alberta. In 1920 he was appointed principal of the school of Agriculture at Raymond, Alberta, and in this capacity superintended irrigation demonstration and extension services among the farmers.

with the degree of B.S.A. During last summer he did extension work for the Manitoba Department of Agriculture in the northern Manitoba, with headquarters at Steinbach, Man.

William Harkness, Weyburn, Sask.

William Harkness, who is now in charge of the Colonization Finance Corporation zone at Weyburn, Sask., was born and raised on a farm in Scotland. Migrating to Canada, he worked on a farm near Port Arthur, Point and Glenora, Man. He also is a graduate of Manitoba Agricultural College.

Enlisting in the 43rd Battalion, Mr. Harkness served overseas until 1919. On his return to Canada he joined the Soldiers' Settlement Board as field supervisor and inspector, holding this position until 1920. While with the S.S.B. Mr. Harkness was supervisor in Southern Saskatchewan, Swift Current, Oxbow and Regina. He appraised and purchased land, stock and equipment. In addition to his work among the soldier settlers he carried out special work in connection with the settlement of British families in his area. A valuable period of service with a private mortgage company preceded his appointment with the C.F.C.

Kenneth D. McLean, Britt, Man.

Kenneth D. McLean, one of the younger farm managers of the Colonization Finance Corporation, has been appointed assistant in the Brandon district. He is a Manitoba man, born in the Brandon district, where his father is a successful farmer.

He has done survey work in economics for the Pioneer Problem Committee, chief in the Swan River district, and won the Co-Operative Marketing Board scholarship for the highest standing in economics in second and third years.

Prince Is Perfect Host

Staff Has Little To Do With Plans For Entertainment

Details of recent private and informal entertainments by the Prince of Wales reveal a side of his nature but little known to the public.

As a host the Prince plans most of his parties himself, and leaves little to his staff. He selects the menu for his own guests, and has scores of recipes for unusual dishes which he has collected in all parts of the world. He has very decided ideas about food, and takes enormous pains for its preparation.

At work in his study, the Prince invariably starts his own work, always gets it right, then, he says, and for lunch usually takes only a business man's snack, probably a plate of cheese and celery sandwiches.

The Prince's parties at York House are often held in the grey-and-silver room, a room with folding doors and alcoves so constructed that it can accommodate dinner parties of all sizes. Even when the affair is a small one, there is a sense of coziness and intimacy lacking in the usual huge Mayfair reception room.

Recipes For This Week

(By Betty Barclay)

MARSHMALLOW FLUFF

(Serves 6-8)

1 cup cream.

1/4 cup sugar.

1 cup quartered marshmallows.

1/4 cups orange segments.

Whip cream until thick, fold in other ingredients. Serve cold.

Variation: Use colored marshmallows—pink, green, orange—and add a small bottle maraschino cherries. Cut cherries in half.

ORANGE AMBROSIA

(Serves 6)

6 oranges.

1/2 cup powdered sugar.

1/2 cup grated coconut.

Peel and slice oranges. Cut slices into halves or quarters. Arrange serving dishes, sprinkle with sugar and coconut.

Only Chance For Rest

Writer Had Good Reason For Using Ordinary Bed

Ed. Howe, a noted philosopher of Atchison, Kansas, dropped in at the local stationers to buy a fountain pen, if as he put it, the dealer could show him why he should have one.

"Well," and the latter, you do all your writing with a pen. Just think of the time you could save in not having to dip your pen into no ink bottle."

"Young man," solemnly remarked the sage of Potato Hill, "when I dip my pen in the bottle that is the only time all day that I get any chance to rest. Do you want to work me to death?"

Increase Bacon Exports

An increase of 5,739,000 lbs. or nearly 28 per cent, was shown in the export sale of Canadian bacon and ham to all countries for the first quarter of this year. Sales this year amounted to 7,752,000 lbs. as compared with 2,013,000 lbs. in the first three months of 1931. For the week ended June 10 the price of Canadian bacon in the British market ranged from 54 to 58 shillings per long cut. An average price which was second only to the Irish product.

Professor—"Most of the objects found in the tomb of Tut-Ankh-Amen are covered with hieroglyphics." She—"Good gracious, how awful. But then I suppose they are all dead."

Bulgaria is restricting the entrance of luxuries into the country.

The sweet pea is a native of Sicily.

Total Eclipse Of the Sun

Begin In Hudson Bay Area and Will Be Visible In Quebec

In addition to the Imperial Economic Conference, there will be another event in Eastern Canada this summer which promises to attract universal attention. This will be the total eclipse of the sun on August 31st. The eclipse will be visible from a zone running through the Province of Quebec and skirting the City of Montreal.

Though usually total eclipses of the sun occur almost every year, the Director of the Canadian Government Observatory points out their occurrence as total at or near any specified locality is a somewhat rare phenomenon. The last one to be visible as total in Canada was on January 24, 1925, on which occasion the path of totality swept across western Ontario, crossing the Niagara River into the United States and skirting the Atlantic Ocean near New Haven, Connecticut. After the 1925 total eclipse the next one to be visible in Canada will be in 1954.

For the 1933 eclipse the central line of the path of totality begins in the Arctic regions, sweeping down across Hudson Bay and striking the eastern shore of James Bay; it crosses the St. Lawrence near Maskinonge and Pierreville, Que., some fifty miles east of Montreal, and passes across the international boundary a few miles east of Rock Island and Derby, Vermont, passing into the Atlantic Ocean in the vicinity of Portland, Maine. The width of the shadow zone in southern Quebec is approximately 100 miles; the western edge passes through Montreal and near Boston, Mass., the eastern edge will be about 25 miles to the east of Three Rivers, Que.

The duration of totality on the central line is about 100 seconds, diminishing to zero at the eastern and western limits. The shadow travels at an average speed of about half a mile per second, traversing the distance of roughly 700 miles from James Bay to the coast in a little over 20 minutes; it crosses the River St. Lawrence at 3:24 p.m. Eastern Standard Time, the international boundary at 3:27, and leaves the coast of Maine at 3:31. The direct rays of the sun at this time is about 20 degrees south of west and the altitude about 30 degrees.

Several parties of scientists from other countries are coming to observe the eclipse and Montreal will be one of the principal points where these parties will concentrate. They will take advantage of the facilities and co-operation of McGill University.

Case Puzzles Doctors

Bones Of Eleven-Year-Old Girl Break With Slight Strain

Physicians are puzzled over the case of Mary Mostagh, of Over, Mich., who has never been in a serious accident, yet has broken nearly every bone in her body.

The 11-year-old girl was under treatment in a Chicago hospital by Dr. Frederick Harvey, of Northwestern University. She was suffering from a broken arm caused by a slight strain.

The physician said X-rays revealed nearly every large bone in her body had been broken at least once. "The examination showed that the bone structure is so thin and brittle," said the physician, "that the slightest stress causes a fracture. She has had 35 to 40 fractures."

A Young Globe Trotter

Thirteen-Year-Old Chicago Boy Takes Trips Alone

The boy who created considerable publicity by his unaccompanied world trips arrived in Winnipeg recently en route for Vancouver, to sail for the Fiji Islands. He is Hartley de Gerald, 13-year-old son of John de Gerald, vice-president of the People's National Bank and Trust Company, Chicago. Each year this boy traveler sets out on his own for some part of the globe, his last trip being to the Arctic in 1931.

France Has Dog Hotel

Catering to dog-owners who visit England and must leave their pets behind, because of quarantine regulations, absurdous hotel for canines is being erected in the mountains near Mentone, France. The promoters promise the latest in kennels and stress the benefit of exercising in the fresh mountain air.

Artificial ice came into use industrially about 1880.

Here and There

The Nova Scotia Dairymen's Association will hold their next annual convention, in 1933, at the Cornwallis Inn, Kentville, N.S.

Shipments of celery to Canada this year from Bermuda totalled 35,000 crates in contrast to last year when the shipments were virtually negligible.

Eastern Steamship Lines, Inc., had heavy traffic on an excursion from New York to Nova Scotia on the occasion of the first trip in June of the S.S. Acadia from New York to Yarmouth, N.S.

Railroad transportation is an essential economic function on this continent and given reasonably free rein should speedily show good recovery using it to increase buying of materials and employment of labor, says the Greenville (S.C.) News editorially.

Total production of honey in Canada in 1931 amounted to 27,867,397 lbs. valued at \$2,058,984. Ontario led the Dominion with a production of 12,000,000 lbs. with Manitoba second with 7,547,375 lbs. and Quebec third with 5,633,400 lbs.

Ten thousand rainbow trout fingerlings have been deposited in the French River in June, following 7,500 fingerlings deposited last year. The previous experiment was so satisfactory that the present action has been taken and if success still attends these efforts, the French River Bungalow Camp will have added rainbow trout to its already well diversified angling attractions.

Bob Davis, globe-trotting New York Sun columnist, is back in his beloved British Columbia, having recently arrived from Honolulu aboard the Empress of Canada, of the Canadian Pacific fleet. He proposes to spend some time in fishing expeditions both in the province and also in the Rockies where he will meet Irvin S. Cobb and Courtney Rileigh Cooper, also famous American publicists.

Tourists spent almost one million dollars for every working day in Canada last year, a sum virtually equal to \$280,000,000, the Cannington, Ontario, Gleaner, points out and claims that this puts it into the class of big business which should be carefully fostered. Commenting on the same subject, the Nelson, B.C., News states that there are numbers of small towns throughout Canada which have not yet realized what the tourist business could do for them.

Evidence of the growing popularity of the Canadian Pacific Railway low rate return trips, inaugurated this year, was again furnished by the success of the Quebec Province and Montreal excursion to Toronto and Niagara Falls, June 17, when no fewer than 2,500 Quebecers took the trip in four specials on the Friday, returning the following Sunday night. His Honor the Mayor of Toronto issued a hearty welcome to those making the trip.

Old Suits look like new when they leave our plant. Rainbow Cleaners.

BAPTIST ASSEMBLY AT McLAURIN BEACH ON GULL LAKE

Boy's camp after a most successful session closed on July 11th. Rev. L. W. Williamson, of Edmonton, Director with his leaders gave the boys a profitable holiday. Girls Camp opened on the 11th and promises to be largely attended. The Assembly opens on July 21st. Speakers from local cities and Dr. Schult, of Toronto will fill in a very attractive program. The public about Lacombe are cordially invited.

ISLAND PRISON

FOR DOUKHOBORS
The British Columbia Government has discovered a solution for the problem of incarcerating more than nine hundred fanatical Doukhobors who persist in believing they can flout Canadian law whenever they feel like it. The nudists will spend the next three years on a small island not far from Victoria. As the island is unpopulated they will be able to practice their nude principles to their heart's content, but they will be debarrd from burning more schools or dynamiting more bridges.

The attorney-general of the sister province has been criticized by some sob sisters who denounced the severity of the punishment inflicted on the Sons and Daughters of Freedom. Needless to say none of this criticism emanated from men and women who have been neighbors of the refractory Doukhobors. Most of it originated in Vancouver which is a long way from Grand Forks and Thrusma. Law-abiding citizens, and these include a large proportion of the Doukhobor community, a well, did not object so much the nude parades as to the criminal activities of the lawless Doukhobor element.

As the Victoria Times points out, the fanatical which inspired nude parades also prompted the destruction of schoolhouses and other public buildings, attacks on railroads involving risk to the lives of people traveling on them, and other offenses against the interests of citizens who live in the vicinity of the Doukhobor

settlement. If the attorney-general had not taken a firm stand in dealing with the matter, it was only a question of time when the public in that locality who are not Doukhobors would have taken the law into their own hands, and resorted to measures of a more summary character than those which the Crown has employed under the law. The attorney-general has had to consider not only the lawless practices of the fanatics themselves, but their effect upon the patience of the law-abiding population whose interests were being threatened by them. This is an important aspect of the situation which should be borne in mind by those who are disposed to criticize the measures he has taken."

JUDICIAL SALE OF FARM PROPERTY NEAR LACOMBE
PURSUANT to an Order for Sale there will be sold by Public Auction at the Post Office in the Town of Lacombe, Province of Alberta, at two o'clock in the afternoon on Saturday the 29th day of July A.D. 1932, the following described property: The South West quarter of section thirty-two (32) and the South East quarter of section thirty-one (31) and the North West quarter of section twenty-nine (29) all in Township forty-one (41) range twenty-six (26) West of the fourth meridian, in the Province of Alberta, subject to prior encumbrances registered against the said land, particulars of which will be exhibited at the time of sale, and subject to the reservations contained in the existing Certificate of Title. The property will be offered for sale subject to an upset price which

has been fixed by a Judge at the sum of \$7500.00, and subject to taxes due on the said land, a statement of which will be exhibited at the time of sale.
Terms of sale, 25 percent cash and the balance within sixty days from the date of sale.
The vendor is informed that there are upon the said lands the following improvements:—
1 Frame shingled roof cottage in fair condition.
1 Frame shingled roof granary in fair condition.
2 Log and frame stables.
1 Small frame well house.
There are about 270 acres of the said land under cultivation and 210 acres now used for pasture, a considerable portion of which can be brought under cultivation.
The soil consists of rich, black loam.

All the said land is enclosed with a two strand barb wire fence in poor condition. There are also cross fences.
The said property is situate six and one half miles from the Town of Lacombe, and three and one-half miles from the Arbrodale School.
For further particulars and conditions of sale apply to J. S. McCormick, Solicitor for the Plaintiff.
Dated at Lacombe, Alberta, this 9th, day of June A.D. 1932.
E. S. Hegg, Clerk of the Court.
